

DocDive platform

Artificial intelligence
for a smooth working day

Facts and figures

1.8 hours a day, employees spend searching for information on average.⁽¹⁾

By 30-50%, AI-based solutions reduce search time and improve information accuracy by 35%.⁽¹⁾

85% of employees feel that their job satisfaction is increased by efficient document search.⁽²⁾

70% of companies find that AI-based search solutions make their employees' daily work easier.⁽²⁾

Ask, don't search.

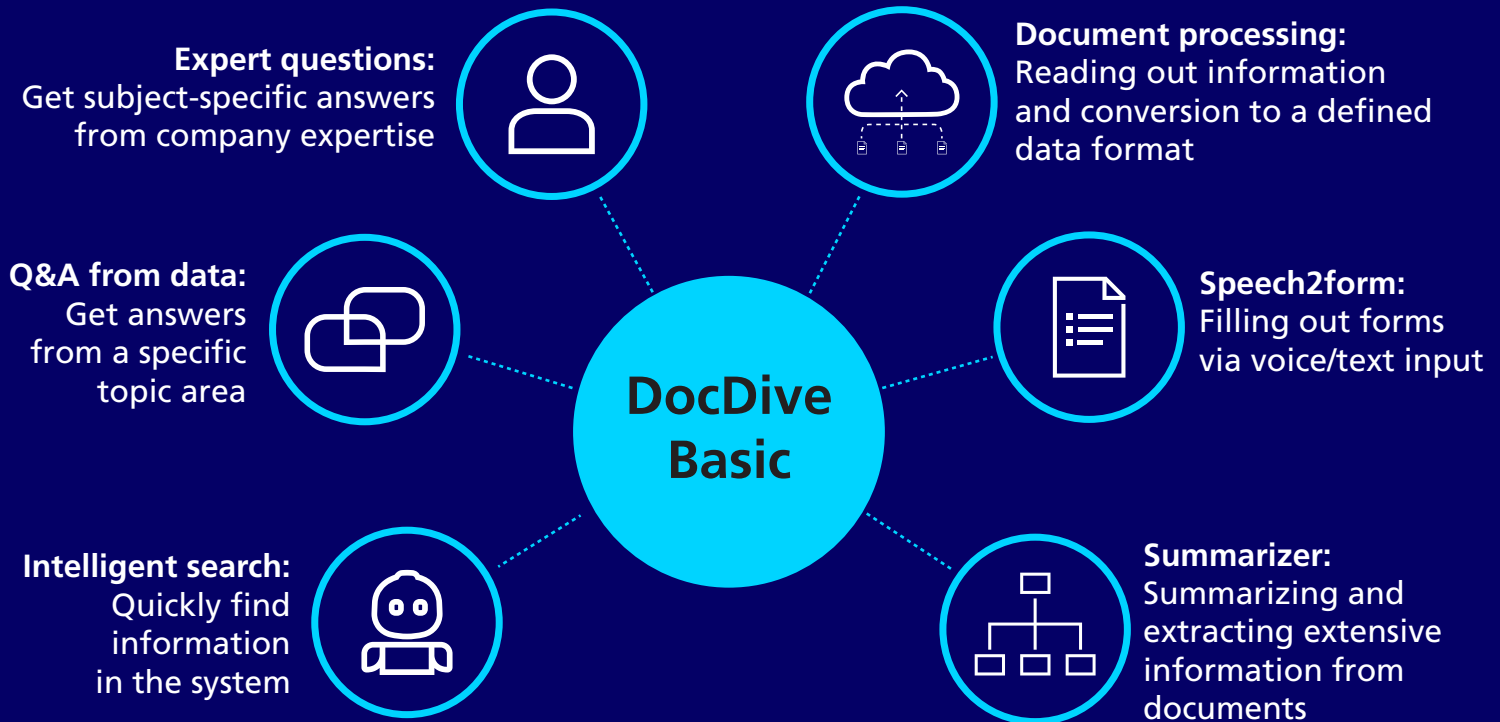

What are you waiting for? Simplify the everyday work of your employees with our user-friendly and AI-based DocDive platform.

Ask your questions to our digital assistant. This assistant searches all information and instructions stored in the internal systems and provides the correct answer immediately, directly referencing the corresponding content in the original document.

(1) McKinsey & Company: The state of AI in 2023: Generative AI's breakout year (2023)

(2) World Economic Forum: The Future of Jobs Report 2023

Platform and modules

DocDive at a glance

Functionality

- Information preparation using Large Language Models (LLM)
- Traceability of the sources used and direct access to the original information

Offerings

- On-premise
- Hybrid
- SaaS

Integration

- Integration into existing applications, no jumping back and forth between different applications
- Connection of various data sources, e.g., archive, file system

Data protection

- Use of all input data exclusively in the company's own model and in compliance with legal and ethical principles (irrespective of the company)
