

Andrej Vckovski, Chairman

Dr. Andrej Vckovski is a founding partner and CEO of the Netcetera Group. Following his studies at ETH Zurich, he received his doctoral degree at the University of Zurich. He is Chairman of the Swiss Internet Industry Association (simsa) and a Member of the Board of ICTswitzerland as well as of Switzerland Global Enterprise.

Ronnie Brunner

Ronnie Brunner graduated as electrical engineer from ETH, has an MBA from the University of Rochester and is a Netcetera founding partner. As a member of the executive management, he has, among other things, set up the product business at Netcetera as a second pillar alongside the project business. He will continue to carry out operational tasks in the product environment and strategically develop the product portfolio of the Netcetera Group.

Thomas C. Flatt

Dr. Thomas Flatt is an entrepreneur, consultant and a board director. This follows after his career as a physician, a management consultant at the Boston Consulting Group, as member of the executive committee at Swisscom Group as well as Adeccoand, most recently, as board member of Abraxas. He received his doctorate in medical computer science and earned his MBA at INSEAD in Fontainebleau. Thomas Flatt is president of the industry association, swissICT, and vice-president of the governing body, ICTswitzerland.

Mike Franz

Mike Franz has a technical degree in electrical engineering from the Swiss FIT. Already during his studies he founded a software company specializing in bespoke software development for the medical sector. After founding Netcetera in 1996, he focused on the acquisitions activities and the account management of large clients. Until May 2017, acting as head of sales and business development and member of the executive board of Netcetera AG, he was responsible for all industry-aligned acquisition activities. Currently, Mike Franz continues to strategically develop the Netcetera Group through his existing activities on the Board of Directors. At the same time, he supports the operative business in business development and key account management in a transitional phase. Additionally, he is a Bank Council of Thurgauer Kantonalbank (TKB).

Hansruedi Vonder Mühl

Dr. Hansruedi Vonder Mühl joined Netcetera as a software architect and technical project manager after his PhD at ETH Zurich in 1996. From 2001 he managed the Software Engineering division as a member of the executive management. He was also responsible for human resources and recruitment. He will continue to develop Netcetera in strategic projects and to provide operational support for project coaching.
